

Greetings, I have subscribed to satellite radio for the past seven months and I love it. The variety and choices I have are the BEST. The quality of this service is not comparable to anything I have experienced before. I am paying for this because I want the quality music, news traffic and weather choices offered by XM. Whatever I need when I need it that is what I am paying for.

I respectfully urge you to reject the NAB's petition 04-160. I have the quality service that I deserve right now and I want to keep it. I do not accept the National Association of Broadcasters to tell me what I can or can't hear on my radio. I am the consumer and I choose XM radio. It is my first amendment right to have this choice. Do not limit it or take it away.
